- stand ups, retrospectives
Miro
Figma

ALSO

Human rights charity trustee

Improv comedian

Pub quizmaster

I have worked for seven years in **developing client relationships** and **understanding user needs**. Much of this time has involved **creative problem solving** and **delivering against high expectations**.

I am proficient in the fundamentals of several modern web technologies, through **pair programming** and **regular coaching**.

I am now looking to join an **ambitious and collaborative team**.

WORK EXPERIENCE

Work in Progress, *Developer and QA lead* 🔗
2020 – present | London, UK
A React app for graphic designers where they can upload works in progress to get feedback from other professional creatives.

As well as building the server, database and Express routes and React styled components on the front end, I set up CodeCov and Travis to monitor builds and codebase integrity. I ensured clear and concise naming conventions and a clean database schema for effective queries.

Criminal Appeals Fund, *Developer and UX/UI lead*
2020 – present | London, UK
A platform for barristers to seek funding to appeal cases where certain criteria set by the product owner are met.

I led the UX/UI function, arranging user testing and designing scripts and interviews based on sessions with our PO and creating our style guide.

Shelter, *New Corporate Partnerships Manager*
2018 – 2020 | London, UK
Building strategic partnerships with organisations to support our national homelessness services.

I led on an ambitious campaign to end housing benefit discrimination, pushing for a web tool that made me realise that my passion lies in building tech to make the world a better place.

Great Ormond Street Hospital Charity, *Corporate Partnerships*
2015 – 2018 | London, UK
I managed eight national partnerships and developed corporate responsibility strategies to meet their needs.

EDUCATION

Founders and Coders 🔗
Mar 2020 – Jul 2020 | London, UK
• Highly selective peer-led web development course
• Top ten bootcamp in Europe 🔗
I have worked hard to learn skills across modern web technologies.
Weekly agile sprints in full stack development with in diverse teams.

Durham University, *Mechanical Engineering (New & Renewable Energy)*
